Jon,

SendOutCards was looking for a new phone system. We were in contact with a company that recommended two phone systems for our needs. We felt that the Inter-Tel system was the direction we wanted to go in. So we looked for bids from multiple companies for the same phone system. The bid from ProTel was not the lowest of the bids we received. However, after meeting with ProTel's people and with the demonstration of the phone system we made the decision to go with ProTel.

ProTel has provided the services promised in the time frames agreed to every time. Even in the case when we have requested shorter than normal time frames ProTel has delivered. We have found that our experience from start to finish has been an excellent one. We have had great follow up and ongoing support. As we seek additional solutions to our needs they are being met. We can report a very positive experience with ProTel every step of the way.

Sincerely,

Glen Bogue, SendOutCards
